ENTERPRISE PERFORMANCE MANAGEMENT

A person in a dark suit is holding a white tablet computer. In the background, a laptop and some documents are visible on a desk. The image is partially obscured by a white diagonal shape on the right side.

”Our implementation project with Agium EPM was almost too successful. It has elevated expectations for future projects”

Stijn Goeminne, CFO Premium Sound Solutions

We enable you to focus on the story behind the numbers

Modern-day performance management is more complex and time-pressured than ever. Beside faster closing cycles, the view of today's CFOs are often complicated by factors such as multiple currencies, time zones, journals, consolidation methods and tax provisioning, as well as the growing trend for more supplemental data and sustainability reporting.

What we do to become your preferred Enterprise Performance Management Partner

Our consultants are highly respected in the market for their experience and knowledge. Many have worked for more than 15 years at large EPM consulting firms.

By hiring our consultants, your company benefits from this in-depth experience. We are personally invested in our company and your success. This success starts by enabling our customers to focus on what really matters: the story behind the numbers. That is what makes Agium EPM the preferred EPM Partner for all our customers.

Services & Software

When it comes to EPM, each tool and process must fit your specific and unique set of needs like a glove.

That's why everything we do is aimed at delivering you the most concrete and effective solutions: from design to upgrades, from performance optimization to full implementations. We design, deliver and maintain software solutions based on Oracle|Hyperion and OneStream.

ORACLE®

With a user base harboring many of the world's Fortune 500 companies, Oracle is globally recognized as a provider of top class software, hardware and solutions. It offers hundreds of software platforms capable of addressing most finance or IT tasks.

Oracle's EPM solution is comprised of several modules which can be integrated to address various financial reporting processes including consolidation, planning, budgeting and data warehousing.

 **ONESTREAM**
GET BACK TO BUSINESS

The OneStream founders are the original creators of Oracle|Hyperion products FDqM and HFM, two of the most widely used EPM solutions still used in the marketplace.

OneStream XF delivers the FIRST truly unified platform for all your EPM solutions to address the concerns of the Office of Finance around risk management, efficiency and reporting. While relatively new, OneStream XF is showing great promise and has already been embraced by several public listed, multi-billion US\$ companies.

Part of Agium
